Differentiated instruction, also called differentiation, is a process through which teachers enhance learning by matching student characteristics to instruction and assessment.

WIDA Screener Online is an English language proficiency assessment given to new students in grades 1–12 to help educators identify whether they are English language learners (ELLs). It is intended to help educators make informed decisions about the appropriate level of instruction for their students.

Intentionally using assessment to differentiate instruction will help your young students succeed in transitional kindergarten, and build the strong foundation that will ultimately lead to success in their academic endeavors.

You'll need to constantly assess how your efforts are affecting your students while keeping the discussion open and engagement high. Differentiated instruction takes a lot of planning.

A book that gently teaches the true essence and workings of peace. WHAT IS PEACE? helps children to know that peace begins within ourselves, that it begins with the choices we make, and that it is a journey we all share. It is a journey that requires understanding, patience, and wisdom. It is a journey that requires us to be kind, compassionate, and loving. It is a journey that requires us to work together to create a world that is peaceful and just.

Differentiated Instruction Use Formative Assessment to Differentiate Instruction Educators use frequent formative assessments to determine the needs of each student. These assessments are used to inform instruction, adjust teaching strategies, and provide ongoing feedback to students. By using formative assessments, educators can make sure that they are meeting the needs of all students and helping them to succeed.

Differentiated assessment is the way by which teachers modify and match assessment with the varied characteristics/profiles of students. It is a process by which teachers assess students and then use that assessment information to tailor instruction to meet the needs of each student.

In education, the term assessment refers to the wide variety of methods or tools that educators use to evaluate, measure, and document the academic readiness, learning, and achievement of students. Assessment is the element that steers instruction in the differentiated classroom. Using ungraded tests or surveys to pre-assess students' readiness and interests before or at the beginning of instruction is a common practice in differentiated classrooms.

Assessment is the process of measuring and evaluating the performance of students. It is used to determine the level of understanding, knowledge, and skills that a student possesses. Assessment is a critical component of differentiated instruction, as it helps teachers to identify students' strengths and weaknesses and to tailor instruction to meet their individual needs.
